Model Names	Main Difference	Model Group	Model Description
26.2_FAA	Author Recommended (FAA)	Author Recommended (FAA)	The author recommended model for 2026 (fleets−as−areas for the LLS, no interpolated data; see Appendix 3C)
25.12	1Reg (GOA Interpolation)	Continuity (1Reg)	The 2025 model accepted for management advice updated with data through 2026 (fits CPUE and historical LLS+LLF lengths, uses GOA interpolation for LLS through 2023)
26.1_1Reg	1Reg (Carryover Interpolation)	1Reg	The updated single region model using the carryover interpolation for the LLS (see Appendix 3B)
26.1_1Reg_REMA	1Reg (REMA Interpolation)	1 Reg Sensitivity	The updated single region model with LLS index values interpolated using REMA
26.1_1Reg_GOA_Use_BS_LLS	1Reg (BS Interpolation)	1 Reg Sensitivity	The updated single region model with terminal year (2026) GOA LLS index values interpolated based on the 2023 to 2026 change in the BS RPNs
26.1_1Reg_GOA_Use_AI_LLS	1Reg (AI Interpolation)	1 Reg Sensitivity	The updated single region model with terminal year (2026) GOA LLS index values interpolated based on the 2022 to 2026 change in the AI RPNs
26.2_FAA_LLS_BS_Dome_DN	FAA (LLS BS Dome DN)	FAA Sensitivity	The FAA model with a dome in the BS LLS selectivity estimated using a double normal function
26.2_FAA_LLS_BS_Dome_Gam	FAA (LLS BS Dome Gamma)	FAA Sensitivity	The FAA model with a dome in the BS LLS selectivity estimated using a gamma function
26.2_FAA_3LLF_BS_Dome_DN	FAA (3LLF BS Dome DN)	FAA Sensitivity	The FAA model with 3 LLF fleets and a dome in the BS LLF selectivity estimated using a double normal function
26.2_FAA_3LLF_BS_Dome_Gam	FAA (3LLF BS Dome Gamma)	FAA Sensitivity	The FAA model with 3 LLF fleets and a dome in the BS LLF selectivity estimated using a gamma function
26.2_FAA_3LLF+LLS_BS_Dome_DN	FAA (3LLF+LLS BS Dome DN)	FAA Sensitivity	The FAA model with 3 LLF fleets and a dome in the BS LLF and LLS selectivity estimated using a double normal function
26.2_FAA_3LLF+LLS_BS_Dome_Gam	FAA (3LLF+LLS BS Dome Gamma)	FAA Sensitivity	The FAA model with 3 LLF fleets and a dome in the BS LLF and LLS selectivity estimated using a gamma function
26.2_FAA_3LLF+LLS_BS_Dome_DN_PE_q	FAA (3LLF+LLS BS Dome TV q)	FAA Sensitivity	The FAA model with 3 LLF fleets, process error (time−varying) on LLS q, and a dome in the BS LLF and LLS selectivity estimated using a double normal function
26.2_FAA_REMA	FAA (REMA Interpolation)	FAA Sensitivity	The FAA model with LLS index values interpolated using REMA
26.2_FAA_CPUE	FAA (CPUE)	FAA Sensitivity	The FAA model with CPUE data fit (through the last year of available CPUE data −− 2022)
26.2_FAA_TS	FAA (Trawl Survey)	FAA Sensitivity	The FAA model with GOA Trawl Survey data fit
26.2_FAA_TS_CPUE	FAA (CPUE and Trawl Survey)	FAA Sensitivity	The FAA model with GOA Trawl Survey and CPUE data fit
26.2_FAA_M_Pr_0.065	FAA (Lower M Prior)	FAA Sensitivity	The FAA model with an M prior mean = 0.065
26.2_FAA_M_Pr_0.075	FAA (Lower M Prior)	FAA Sensitivity	The FAA model with an M prior mean = 0.075
26.2_FAA_M_Pr_0.095	FAA (Higher M Prior)	FAA Sensitivity	The FAA model with an M prior mean = 0.095
26.2_FAA_M_Pr_0.105	FAA (Higher M Prior)	FAA Sensitivity	The FAA model with an M prior mean = 0.105
26.2_FAA_M_Pr_0.115	FAA (Higher M Prior)	FAA Sensitivity	The FAA model with an M prior mean = 0.115
26.2_FAA_M_1Reg	FAA (Fixed M)	FAA Sensitivity	The FAA model with the M value fixed at the single region model M estimate
26.2_FAA_TV_Selex_LLS	FAA (TV LLS Selectivity)	FAA Sensitivity	The FAA model with continuous, semi−parametric, time−varying survey selectivity (see Appendix 3C)
26.3_Spat_5Reg	Spatial (5 Regions)	Spatial	The 5 region spatial model that fits tagging data and estimates age−varying, but time−invariant movement (See Appendix 3D)
26.4_Spat_3Reg	Spatial (3 Regions)	Spatial Sensitivity	The 3 region spatial model that fits tagging data and estimates age−varying, but time−invariant movement (See Appendix 3D)
